

## **Transcript for Rogers wormery**

Hello I thought today I was going to harvest the compost from my wormery. So here you'll see I've got a typical three tier wormery so first of all you can see we've got some nice food in the top and lots of worms so I'll just put the top aside and the top level where there are food and worms and then on the next level on the next couple of levels you'll see I've got some nice worm compost So I am just going to bring that over here and tip it out. I shall look at recovering the worms and keeping the worms then back in with some food. But you will see that's lovely compost.
